

ALCOHOL & DRUG ABUSE

As part of the RCC's Life Skills Project, we reach out to different high schools to create educational awareness about alcohol and drug abuse as these are some of the major contributors of the increment of rape in society.

Topics discussed at these awareness sessions include:

- Defining a drug and some of the reasons for use
- The process of addiction
- Signs and effects of drug use and abuse
- The types of drugs being used and abused and;
- Statistics

With these topics we hope to reach out to scholars that are using those that haven't started using, as well as those that are thinking about using. This awareness project is interactive and learners get to share the things they already know about alcohol and drugs

Our school facilitators were trained by a SANCA Representative.
